4x40MM Security level P4

(DIN 66399 Standard)

An A4 sheet will be shredded into 390 particles. Each particle is 4*40mm, which is nearly impossible to restore.

30-Minute continuous run time

Shreds continuously for up to 30 minutes (full load) with its high-efficiency continuous heat dissipation technology. If it shreds continuously beyond 30 minutes, the overheat protection function will be enabled automatically and the unit will automatically shut off to protect the motor.

Continuous
30-minute shredding

Automatically shuts off
to protect the motor
after 30 minutes

Intelligent and infrared feed sensor

In standby mode, the shredder starts and shreds immediately and once the sensor detects paper around the paper entry slot. Once the paper has passed through, the shredder will automatically stop, which is intelligent and power-saving.
