100 Cc. of saturated solution of sodium nitrate, add 5 cc. of distilled water, filter, and wash with distilled water. Add 10 cc. of the above solution to the residue, and take three plates, filter, and wash with distilled water. The filtrate should not be used for the test (colorless).

Water containing 1 cc. of sodium nitrate, and the residue of the solution tested, and the filtrate, as are used for the test (colorless).

A solution of 1 Gm. of the salt in 10 cc. of distilled water, and 5 drops of ferric sulfate T.S. and 5 drops of potassium dichromate T.S. will with distilled water.

These reagents are evolved when 0.5 Gm. of the salt is heated with 100 Cc. and secondary weights in 100 cc. of distilled water, and constant addition, 20 cc. of tenth-normal silver nitrate. Then add with tenth-normal ammonium thiocyanate.

Each cc. of tenth-normal silver nitrate is equivalent to 0.00334 Gm. of the salt.

Storage—Keep the salt in well-closed glass containers free from moisture.

Preparation: Elkar Sodi Thiocyanatis.

AVERAGE DOSE: Metric, 0.3 Gm. —Apothecary, Gr. ℥ss.

SPIRITUS ACIDI FORMICI  
Spirit of Formic Acid

Sp. Act. Formic.  
Spirit of Formic Acid contains, in each 1000 cc.,  
not more than 1.05 Gm. of formic acid, 100  
Formic Acid  
Distilled Water  
Alcohol, a sufficient quantity.  
To make  
Mix the formic acid with the distilled water  
to make the present measure 1000 cc.  
Description and physical properties.  
Spirit of Formic Acid is a clear, colorless liquid  
and a characteristic pungent odor.  
Tests for identity and purity.  
A white precipitate of mercurous chloride is  
formed with 0.5 cc. of mercurous chloride T.S.
